

# Upholstery Cleaning

## — Sofa Package —

The package contains the following:

### Stage 1: Initial information collection

Our professional team will collect all the details about the sofa when there is an inquiry for deep cleaning of sofa. So the cleaner comes your home with prior information on the sofa. The information includes the number of seats, the current condition of the sofa, the type of dirt and stains embed on the couch, etc.,

### Stage 2: The Onsite survey

The cleaner arrives at the customer house. He will check the intensity of dirt and stains on the sofa, and determine the fabric of the sofa from its tag. Then he decides which chemicals, equipment, and strategy for the cleaning based on the fabric of the upholstery. He will choose whether to use normal shampooing nozzle or deep cleaning nozzle with a high level of shampooing, water sucking, and extra brushing.

### Stage 3: Pre-Cleaning

The cleaners would remove the dust, sand, and other dirt particles from the surface of the sofas using a powerful vacuum cleaner. We use a lint roller to remove lint or pet hair which the vacuum cleaner can't remove. If there are any spots or stains, we use special chemical agents to remove those.

### Stage 4: Sofa shampooing

We use professional shampooing machine which deals with all the fabric without changing the color and maintaining the fabric status. The cleaner applies the shampoo and water, mixed at normal temperature, on the sofa. This is carefully worked onto the sofa and allowed to penetrate the fiber and remove any grease or oil attached to it. Then the machine will extract out the mixture along with dirt, sterilizing the deep level of the sofa.

### Stage 5: Final with Upholstery Brush

There is some difficult part of the sofa unreachable for the machines especially the backside. We do brushing on those areas manually with an upholstery cleaner brush. At the end of the process, all the dirt and stains will be removed from the fabric. We guarantee our result without causing any damage to the upholstery. Also, we are not cleaning only where the dirt is present but the whole sofa itself.
